WELCOME

Welcome fellow short film lovers,

It's wild to think that it's finally here - this festival has been a tiny dream of mine for longer than I can remember. So many incredible filmmakers over the decades have gotten their start in short films and gone on to create some of our favorite award-winning films. Who knows what the future hold for our immensely talented selected filmmakers, but there's nothing short about it. For now let's enjoy these bite size glimpses into other worlds, and hear their unique stories. We could not be more excited to have such a strong program of short films to share with you and look forward to exploring new visions together, 5 minutes at a time.

Sincerely,

Heather Coates

At that time, there were over 50 independent theatres in Long Beach, today only the Art remains. After the quake of 1933, the façade of the theatre was recreated in an art deco, streamline modern style. As years passed the theatre continued to undergo change as the world around it evolved. In 2008, a group of local investors purchased the theatre and completely remodeled it based on the 1933 blueprints. Since, the Art has once again become the center of Long Beach cinema, showing both first run and small independent films in a beautiful historic setting.
